

IN THE CLAIMS:

Please cancel claims 2-6 and 8-11 without prejudice, and amend claim 7

as follows:

1-6. (Cancelled)

7. (Currently Amended) The display device as claimed in claim 6,

comprising:

a display unit which displays an image;

a display-data line which supplies data of the image from an exterior to said

display unit;

memories which store information for controlling displaying of the data of the

image on said display unit, said information being different from said data of the image;

an operation circuit unit which controls said display unit to display the data of

the image supplied through said display-data line based on the information stored in said

memories;

a data bus which connects each one of said memories to an exterior of said

display device, and supplies the information to said memories from the exterior of said

display device; and

an address bus which connects said each one of said memories to the exterior of said display device, and supplies address signals for selecting one of said memories such that the information is written to the one of said memories selected by the address signals,

wherein said operation circuit unit includes:

a gate driver which drives gate lines of said display unit; and

a data driver which drives data lines of said display unit, wherein at least one of said gate driver and said data driver operates based on the information stored in said memories,

wherein said memories store pattern data, said data driver operating in accordance with the pattern data stored in said memories to control said display unit to display an image corresponding to the pattern data, and

wherein said operation circuit unit further includes a data-synthesis circuit which combines the pattern data stored in said memories and display data supplied from the exterior of said display device to generate synthesized pattern data, said data driver operating in accordance with the synthesized pattern data to control said display unit to display an image corresponding to the synthesized pattern data.

8-11. (Cancelled)
